Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

In response to applicant's filing of an RCE dated Aug 22, 2004. The following action is taken:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 9-326122.

The claims are drawn to an alternative limitation "or". Thu only one of the limitation is needed to shown to meet the claimed invention. The reference shows an optical disk reading apparatus comprising: a disk having wobbled tracks thereon (fig 2), a push pull signal processing circuit to output a servo and RF signal 10, 21, 22, 23, a gain varying circuit to control the gain of the reflected signal in response to the modulated signal see fig 1 having elements 31, 26 and 24 wherein the gain is varied based on the modulated signal EFM see page 21 last paragraph of the English translated copy, meeting the claimed invention.

With respect to the limitation of claim 2. the limitation read on any recording signal having pits and non-pits areas (mirror) which is the inherent feature of the recording signal EFM.

With respect to the limitation of claim 4 see fig 5 element 46.

Art Unit: 2655

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the cited prior art shows the use of a comparator 34 comparing the push pull signal to a threshold value 32 to output a pre-pit signal.

Claim 6 is allowed.

None of the cited prior art shows the limitations as claimed and operating as shown in fig 1.

Any inquiry concerning this communication should be directed to NABIL Z HINDI at telephone number (703) 308-1555.
